

SGV-G 100 - (Strong Gravity Vacuum Generator)
The Power Generation Revolution

1. Introduction

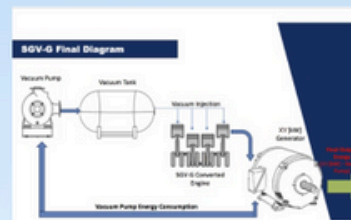

Technological Innovation Meets Economic Efficiency:

The SGV-G (StrongGravitationalVacuumGenerator)100 is a groundbreaking, environmentally friendly technology that generates electricity continuously and independently of external factors such as weather conditions.

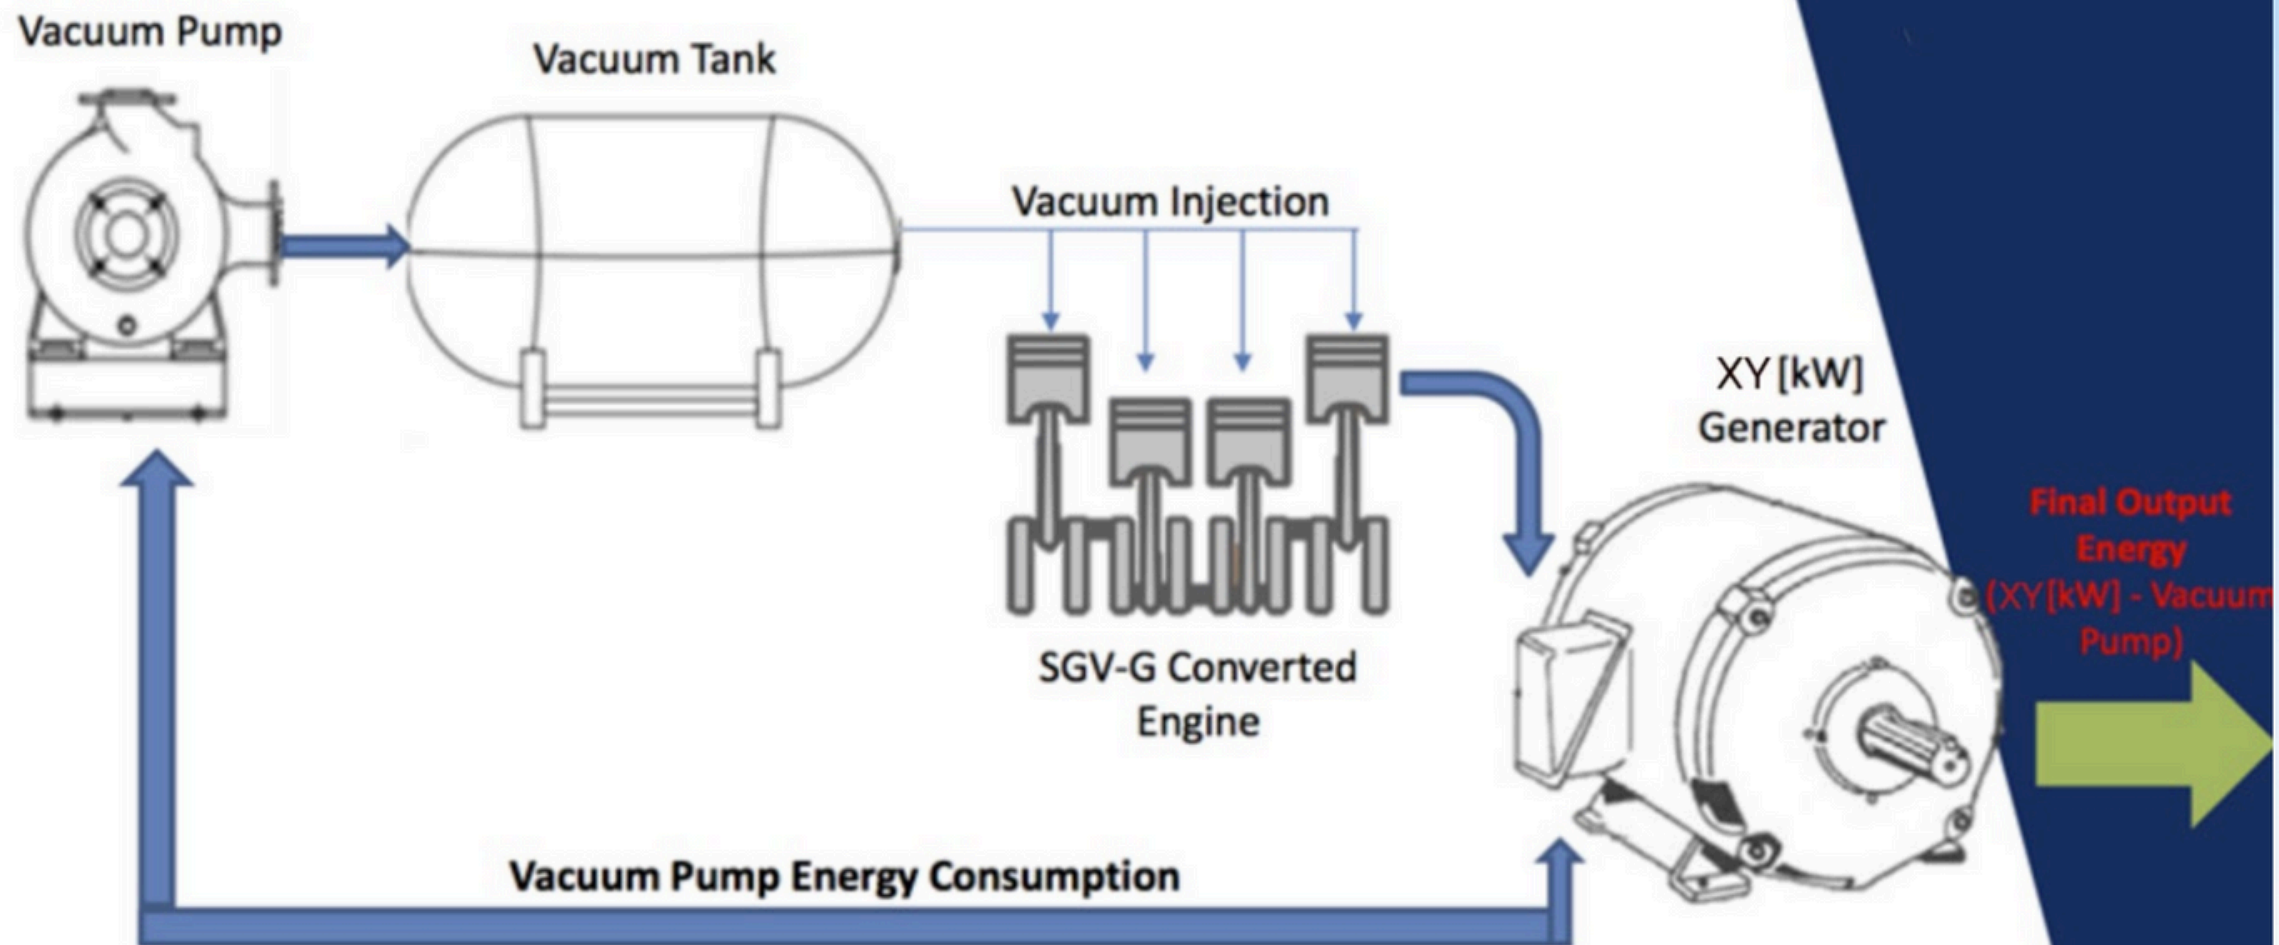

With an investment of between 350,000 and 470,000 USD, the plant will pay for itself in just two years. Thanks to its compact size

- housed in a 20-foot container
- it offers enormous cost advantages over conventional solutions.

The service life is at least 25 years, backed by a 4-year warranty.

2. Problem Definition and Environmental Aspects

The SGV-G technology solves two key challenges:

- 1) Independent Power Generation:** Available Anytime, Anywhere, without harming the Environment.
- 2) Sustainability:** the SGV-G 100 is quiet, emission-free and actively contributes to the reduction of environmental damage caused by traditional power generation.

SGV-G 100 - (Strong Gravity Vacuum Generator)

The Power Generation Revolution

3. Functional Principle

Innovative Vacuum System:

The SGV-G uses a modern vacuum process that generates 304 m³ at 0.001 mbar on a continuous basis.

Energy Efficiency:

Power is drawn directly from a rugged, pressure-tight vacuum storage tank.

Easy to Use:

Once switched on, the system runs fully automatically and with little maintenance.

The Power Generation Revolution

4. *Technical Details*

Motor Block and Vacuum Technology:

- Modular Design with 2 to 8+ Cylinders.
- Fuel-Free operation thanks to clean Vacuum Energy.
- Precise Electronic Control for valve Regulation.

Power Generation:

- Direct Connection to a Generator that supplies Power. at 200–240V or 380–400V.
- 24/7 Operation with Zero Emissions.

Vacuum Storage Tank:

- Capacity: 3,000 litres for an output of 100 kW.
- Can be customised to individual energy needs.
- Robust, durable and manufactured with the highest welding precision.

Safety Precautions:

- Pressure testing and high-quality MIG/MAG welding ensure maximum safety.

7

5. *Economic Efficiency*

Amortisation Period: 2 Years.

Service Life: 25+ Years.

Cost Advantage: No ongoing fuel costs, low maintenance.

Note: The amortisation period is the period of time in which an investment fully covers its costs through the income generated or savings made. It indicates how long it takes for the expenditure incurred to be repaid.

6. *Guaranteed Reliability*

4 Years Warranty:

On all main components, including the most modern vacuum pumps.

Manufacturer Quality: The vacuum pumps are produced by a renowned German company with over 150 years of experience.

7. Benefits for Investors

Sustainability and Innovation:

Access to a revolutionary technology that is redefining the way we generate electricity.

High Return: Through rapid amortisation and low operating costs.

Scalability: Compact design and modular technology enable a wide range of applications.

Environmental Awareness: Contributing to a greener, more sustainable future.

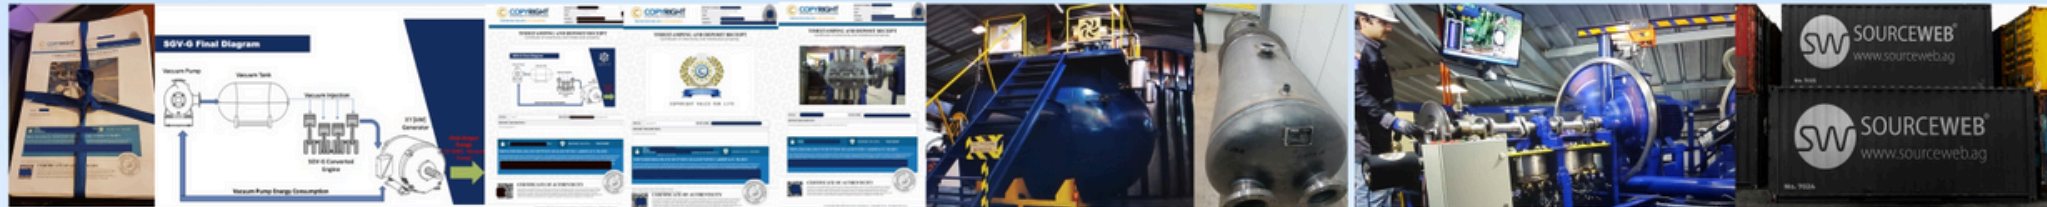

Conclusion

The SGV-G 100 (Strong Gravity Vacuum Generator)
is the future of power generation:
reliable, environmentally friendly and economical.

As an Investor, you have the opportunity to participate in a revolutionary
technology that is ushering in a new era of energy independence worldwide.
