

EXCLUSIVELY AS AN ADDITIONAL MODULE

Presentation

**Innovative Water
Extraction
from the Air**

EFFICIENT TECHNOLOGY

Energy Consumption:

A medium-sized system requires only 5 kilowatt hours of electrical energy to produce 5m³ of drinking water.

Possible Applications:

Our water generators can be used flexibly and supply water exactly where it is needed - directly, cleanly and without additional treatment.

SCALABLE SOLUTIONS

Free Water Production with SGVG

Sustainable and Independent:

If you already have an SGVG machine for generating electricity, you can use the electricity produced efficiently for water production.

Additional Components:

With minimal effort, the system can be for water production can be retrofitted with minimal effort.

Flexible Location:

Produce water where you need it
- or where you want it.

YOUR BENEFIT

Please contact us
for more information
and find the ideal solution
for your water requirements.

Sustainable Water Extraction:
Environmentally friendly and independent
from centralised supply networks.

Pure Drinking Water:
Perfect for immediate use
without additional preparation.

Affordable Investment:
Durable systems with high efficiency
and minimised operating costs.
